Mr. R. Rottman May 3, 1972

J. E. Wickham

Coal Strength

The preparation of filler appears to have an influence on coal strength as indicated by the data given below. Filler cut at the Stockton Street factory, with cigarettes being subsequently made at both the Stockton Street and 20th Street factories, had a stronger coal strength than the cigarettes made at both factories from filler cut at the 20th Street factory.

		% Coal Removal	
		Standard Method	Modified Method
		100 cigts.	200 cigts.
Code	Sample Description		
A2GS	Cigarettes made at Stockton Street with Stockton Street Filler	34	50
A2GT	Cigarettes made at Stockton Street with 20th Street Filler	81	91
A2GU	Cigarettes made at 20th Street with Stockton Street Filler	40	69
A2GV	Cigarettes made at 20th Street with 20th Street Filler	60	85
